

GRAVITY

ULTRAMODERN BEVERAGE DISPENSING SYSTEM

OPERATION

GRAVITY transforms beverage service with its advanced dispensing system, delivering precise, consistent drink ratios through patented Constant Flow Valve (CFV) technology. Its specialty mixing capabilities allow operators to create customized recipes with multiple flavors and flavor shots. Built for efficiency, it eliminates manual brixing and calibration while streamlining service and reducing downtime. IoT connectivity enables quick menu and recipe updates, helping stores keep pace with drink trends and seasonal demand.

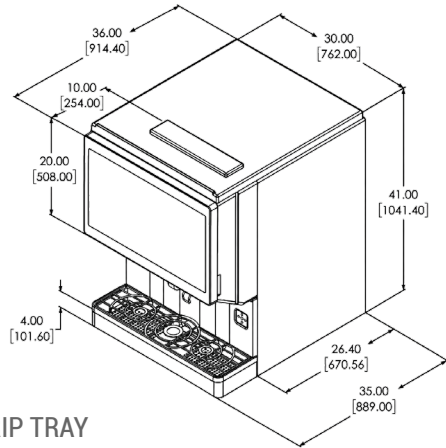

FEATURES

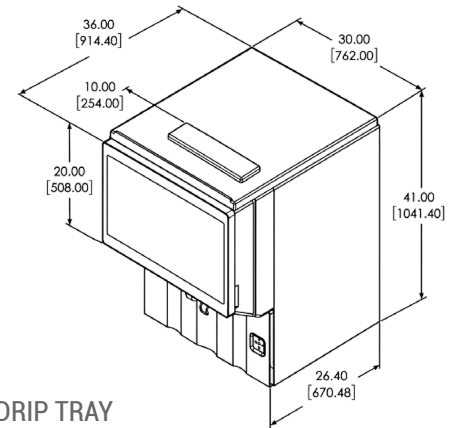

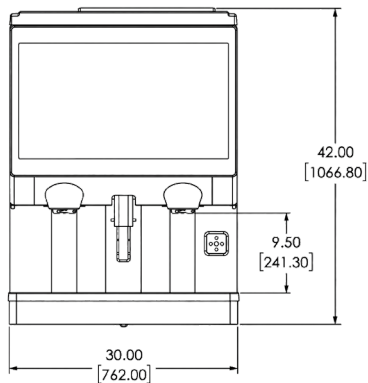

- Automatic ratio control using factory-set CFV technology, with no manual brixing required.
- Over-the-air brix updates support flavor changes and new ratios without requiring a store visit.
- Automated clean-in-place cleans nozzles, drain and ice chute daily.
- Dynamic reprioritization of brand icons based on demand at each store location.
- 24 chilled syrups with 4 ambient flavors.
- Sold-out sensing automatically grays out the icon and disables dispensing until the BIB is replaced.
- Daypart marketing through a custom digital merchandiser updated via IoT.
- No-clog drip tray manages ice and debris to facilitate draining.
- IoT connectivity supports diagnostics, sales data and inventory monitoring.
- Customers can develop custom mixes with smart pairing suggestions.
- Timed agitation.

TECHNOLOGY | IoT Integration

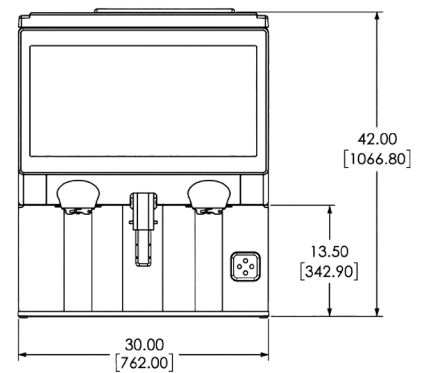

- Remote automatic brixing for each flavor.
- Special-mix recipes.
- Instantly roll out LTOs and seasonal offerings.
- Monitor and control inventory.
- Remote dashboard allows for monitoring of sales trends and product popularity, with data sortable by date, store and time.
- Notifications for sold-out flavors and duration of sold-out.
- Remote diagnostics for drink and carb quality.
- Automatic cleaning reports track cleaning-system bypasses and the length of time cleaners remain sold out.

WITH DRIP TRAY

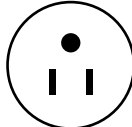

W/O DRIP TRAY

DIMENSIONS

Width	30"	762 mm
Depth	36"	914.4 mm
Height	41"	1,041.4 mm
Weight	360 lb	163.3 kg

ELECTRICAL SPECIFICATIONS

Voltage	115 V	 NEMA 5-15P
Frequency	60 Hz	
Current	8.5 A	
Wattage	1,035 W	
Phase	1 ph	
Ambient Carbonator	115 V, 6.5 A	
Water Booster	115 V, 60 Hz, 1 A	
Connectivity	Ethernet or wireless	

See the electrical chart for the proper electrical requirements. Manufactured for cord connection. Consult your local electrician for cord and receptacle specifications as required by local codes.

Ice machine (sold separately), ambient carbonator and the optional water booster require their own dedicated electrical connection.

ADDITIONAL SPECIFICATIONS

Syrup Flow Rate	3.0 oz/sec
Ice Bin Capacity	273 lb
Water Supply Pressure	50-60 psi at pump
Screen Aspect Ratio	32:9
Cup Clearance	9.5" w/ drip tray 13.5" w/o drip tray
Built-In Cold Plate	Yes

SHIPPING

Width	48"	1,219.2 mm
Depth	48"	1,219.2 mm
Height	65"	1,651 mm
Weight	650 lb	295 kg
